

# 69H1

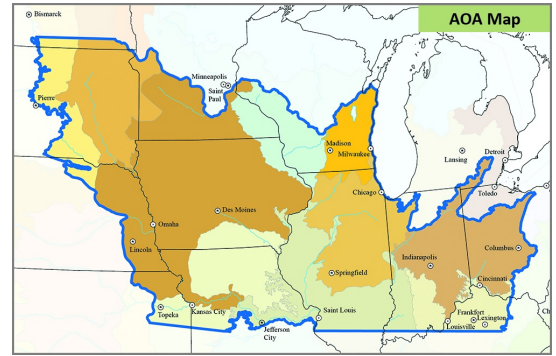

109 RM

69H1PCR™

69H1s semi-flex, blocky ear type delivers high yield potential on highly productive soils. It is a taller plant type with a medium-full canopy that has excellent standability. It offers great top end yield potential and works best on rotated acres.

- Great performance potential in top yield environments
- Good NCLB and GLS tolerance
- Performs best on moderate to highly productive soils
- Medium-full canopy with an upright leaf type
- Adapts well from east to west
- Best on rotated acres

## POSITIONING AND MANAGEMENT

<b>2670</b>	<b>L-M</b>	<b>Semi-Flex</b>	<b>P</b>
GDUs to Black Layer	Pop. Range	Ear Type	Cob Color
<b>16-18</b>	<b>NR</b>	<b>HR</b>	<b>HR</b>
Kernel Rows	Corn-on-Corn	Conventional Tillage	No-Till
<b>R</b>	<b>R</b>	<b>R</b>	<b>HR</b>
Timber Soil	Poorly Drained Soil	Sandy Soil	Early Planting Date
<b>HR</b>	<b>R</b>	<b>HR</b>	<b>HR</b>
Delayed Harvest	Response to Fungicide	Corn-on-Soybean	Late Planting Date
<b>28-34</b>	<b>1335</b>	<b>T</b>	<b>M-H</b>
Recommended Population	GDUs to Mid-Silk	Plant Height	Ear Height
<b>M</b>			
Canopy Type	Herbicide Tolerance		

### RATINGS KEY: 9 = OUTSTANDING 1 = POOR

- 9 Best-in-class performance in a given situation or growing environment
- 7-8 Good to very good adaptability to a given situation or growing environment
- 5-6 Average to slightly above average adaptability to a given situation or growing environment
- 1-4 Avoid using a product in a given situation or growing environment
- NA Rating not available

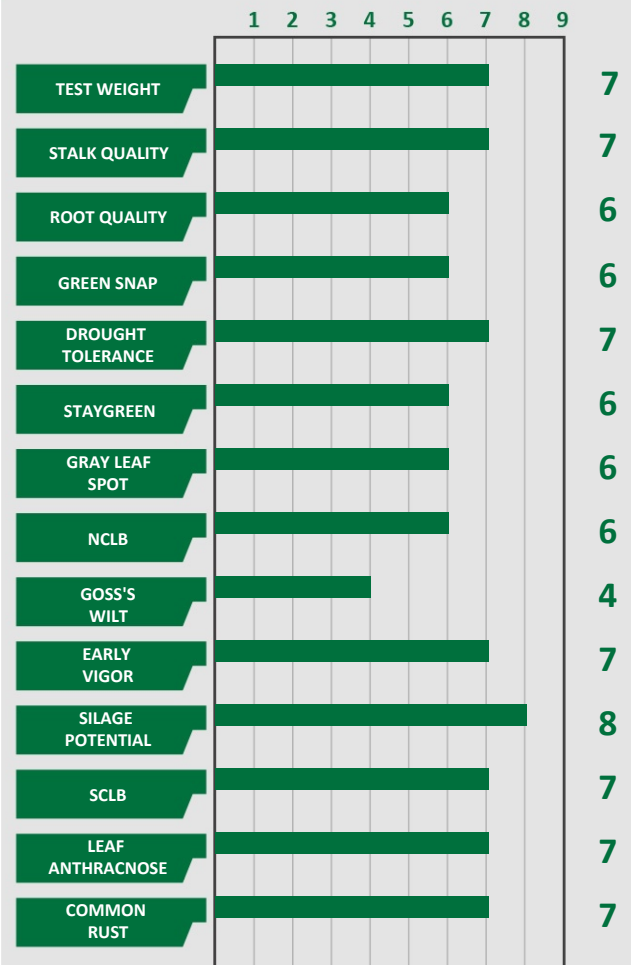

### PLANT AND EAR HEIGHT:

- T = Tall
- M = Medium
- S = Short
- H = High
- L = Low

- HIGH-YIELD
- CORN-ON-CORN
- HEAT/DROUGHT-STRESSED
- POORLY DRAINED

COB COLOR: R = Red, P = Pink, W = White

## AGRONOMICS

Area of adaptation map: Consult with a NuTech representative for planting outside of AOA recommendation. NuTech AOA maps are based on EPA III ecoregions. U.S. Environmental Protection Agency, 2013, Level III ecoregions of the continental United States: Corvallis, Oregon, U.S. EPA – National Health and Environmental Effects Research Laboratory, map scale 1:7,500,000, <https://www.epa.gov/eco-research/level-iii-and-iv-ecoregions-continental-united-states>.

Important: Characteristic scores provide key information useful in selecting and managing products in your area. Information and scores are assigned by NuTech Seed and are based on period-of-years testing through 2017 harvest and were the latest available at time of printing. Some scores may change after 2018 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results.

Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yield genetics with the powerful, non-selective, post emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. Liberty is not registered for use in all states. Always follow grain marketing, stewardship practices and pesticide label directions. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant

to glyphosate. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible. Product performance in water-limited environments is variable and depends on many factors such as the severity and timing of moisture deficiency, heat stress, soil type, management practices and environmental stress as well as disease and pest pressures. All hybrids may exhibit reduced yield under water and heat stress. Individual results may vary. Herculex® I Insect Protection, Herculex® XTRA Insect Protection and Herculex® RW Rootworm Protection, technology by Dow AgroSciences and Pioneer Hi-Bred. AMX - Optimum® AcreMax® Xtra Insect Protection system with YGCB, HXX, LL, RR2. Contains a single-bag integrated refuge solution for above- and below-ground insects. In EPA-designated cotton growing counties, a 20% separate corn borer refuge must be planted with Optimum AcreMax Xtra products.
